# DoD Supplier Cybersecurity Requirements

written by Lauri Moon | October 24, 2018

It is imperative that all DOD suppliers meet the DOD requirement (standard 800-171) in order to supply the Department of Defense.

By attending this 90-minute webinar you will be able to:

- Understand the basic requirements of the standard
- Learn what you need to do to meet those requirements
- Gain important steps to get you started

Why is it important that you meet the DOD requirement?

The next time your contract comes up for renewal, you will be asked if you meet this requirement. If you do not, your contract is at risk for renewal, resulting in a loss of business. The webinar is presented by GaMEP and partner Cytellix.
