

Increase Your Understanding of PPE and Occupational Safety Equipment Standards

written by Lauri Moon | July 21, 2020

Attention manufacturers of personal protective equipment (PPE) and safety equipment, this is an opportunity to hear directly from the International Safety Equipment Association (ISEA), an association for PPE and technologies that enable people to work in hazardous environments. ISEA is an American National Standards Institute-accredited standard developing organization.

ISEA works closely with manufacturers, test laboratories, subject matter experts, end users and government agencies in the standards development process and with its members to support protecting workers worldwide. MEP Center staff will gain an understanding of the PPE standards ecosystem and be able to identify appropriate PPE standards for head and face protection in occupational settings.
