

What Matters in ERP Software Today

written by Lauri Moon | October 22, 2018

Your business, competition, and industry are changing materially and frequently, but, sadly, not all of your technology partners got the memo. In fact, some ERP vendors have been dragging their feet when it comes to cloud, multi-tenancy, and other innovations. As your organization embarks on its modernization journey, what should you use as your transformation yardstick?

Join Brian Sommer, founder of Vital Analysis, as he discusses why multi-tenancy (and other factors!) matter in ERP software today. He will explain:

- The generational changes that define modern ERP software
- How multi-tenancy, platforms, AI and more are altering your technology strategy and business cases
- The key requirements manufacturers want from ERP providers today
- Why your firm might not meet the 'transformation' demands of your board with the constrained technologies of yesteryear

Speakers

 **Brian Sommer, Enterprise Software Industry Analyst, Vital Analysis**

Enterprise software industry analyst Brian Sommer covers the ERP, finance and HR sectors for Diginomica and other publications. Brian began his career began by re-writing a payroll/time-reporting system for a fast food chain and subsequently reworked, implemented, implemented, etc. numerous application software systems.
