

Don't Let Your Supply Chain Put You at Risk

written by Lauri Moon | May 30, 2019

The headlines are full of companies whose reputations have been threatened and damaged—sometimes irreversibly—by supply chain mismanagement. It's not enough any more to have your own house in order. Your risk management strategy needs to ensure that every aspect of your supply chain is protected against avoidable situations, and that you can recover from unpredictable disasters. OSHA can conduct an inspection at your worksite in the event of an injury to another company's employee—would you be prepared if OSHA comes calling?

In this webinar, you'll learn how to protect your company from incidents caused by under-qualified or untrustworthy contractors or suppliers. Don't put yourself at risk—financially or legally—for injuries, damaged goods, late or missed deliveries, machinery repair, insurance claims and any other problems that result from your vendors and contractors. Discover how to focus on supplier risk management; how to gather the information you need to identify potential safety and health risks; and how to work with your supply chain partners to develop policies and procedures that protect them, that protect you, and that protect every employee involved.

Managing Exposure Risks with Innovative Technology: Answering Questions You Were Too Afraid To Ask

written by Lauri Moon | May 30, 2019

Organizations like yours employ EHS professionals to help keep front-line employees safe from harmful workplace exposure. But to do this successfully, you need to accurately identify hazards that put your employees at risk. With technology, instead of having a few EHS professionals identifying hazards and managing risk for thousands of employees, companies can turn to their employees for help. As your first line of defense and best access to hazards and potential risk visibility, your employees should be empowered to help your EHS professionals source exposure hazards across your company. With recent advancements, you can now make that process much easier than ever before.

During this webinar, you will learn how to:

- Implement different methods for your front-line employees to report exposure risks
- Empower employees with innovative technology like wearables, IoT, big data, and more
- Elevate exposure risk management as a key pillar in holistic employee well-being

The Top 6 Employee Training Topics: Requirements and Best Practices to Protect Employee Safety

written by Lauri Moon | May 30, 2019

Employee training is often required by regulation but providing training in non-mandatory topics can help better protect your employees and your company's bottom line. Your overall goal should be ensuring the safety, welfare, and productivity of your workers, not merely satisfying a particular compliance obligation. All training should help employees protect themselves and avoid hazards, so providing training in additional areas (even if not required) gives employees more information to remain safe — and helps protect your business as well.

This presentation will focus on six topics that often cause problems even when employers do provide training. They include:

- Hazard Communication, which consistently appears in OSHA's top 10 list of

most-violated regulations;

- Powered Industrial Trucks, another in OSHA's top 10 list, where training includes operator evaluations;
- Active Shooter/Bullying, which is not required by law, but bullying occurs in nearly every workplace, and preventing violence should be an employer priority;
- Control of Hazardous Energy (Lockout/Tagout), also in the top 10 violations list, which creates the potential for serious injuries and fatalities;
- Bloodborne Pathogens, which impacts many employers - any company with designated first aid responders must provide this training annually; and
- Sexual Harassment, which many employers provide to new hires — but the continued prevalence in workplaces suggests that training could be more effective.

Speakers

✘ **Edwin Zalewski, Editor, J. J. Keller & Associates, Inc.**

Edwin Zalewski has been an editor at J. J. Keller & Associates, Inc. since 1999. He researches and creates content for a number of workplace safety and employee-related subjects. As the Manager of the Workplace Safety & Human Resources Publishing Team, Edwin contributes to a variety of products and delivers presentations around the country. He specializes in discrimination and harassment, overtime, forklift safety, injury recordkeeping, and many other topics.

✘ **Ann Potratz, Associate Editor - Human Resources Publishing, J. J. Keller & Associates, Inc.**

Ann Potratz is an associate editor on the human resources publishing team at J. J. Keller & Associates, Inc. She creates content on employment law issues and best practices for HR professionals, writing and editing a number of HR newsletters and manuals for employers. Ann specializes in topics such as sexual harassment, hiring issues, discrimination laws, disciplinary actions, and terminations.

Common Indoor Air Quality Issues for Manufacturing or Processing Facilities

written by Lauri Moon | May 30, 2019

Many manufacturing and processing facilities face air quality issues. Wet or dry particles can become airborne when food, metal, chemicals or pharmaceutical products are produced or when paper or wood are processed. If left to accumulate in the air, this dust and mist causes numerous safety hazards for operators and the facility.

This webinar will discuss common causes of contaminated air, health & safety risks related to poor air quality, specific issues associated with fine dust and mist, and OSHA regulations governing facility air quality. It will also present ways to improve air quality and ensure quality return air using high efficiency filtration.

Making Safety Visual: 10 Proven Strategies for Building a Safety Culture

written by Lauri Moon | May 30, 2019

Safety professionals everywhere are looking for more effective ways to engage their employees and get them focused on safety. Attention spans are shorter than ever. Employees are stressed, distracted and more interested in checking their smartphones than listening to you. Visual communication is the "secret weapon"

that can help you capture (and keep) your employees' attention.

In this lively presentation, you'll learn:

- Why your employees aren't hearing you and what you can do about it.
- Why visual communication works.
- 10 proven strategies to integrate visual communication into your safety program.

Build a Proactive Culture of Safety with Microlearning

written by Lauri Moon | May 30, 2019

In today's complex and fast-paced world, workplace safety training programs are vital for the protection and wellbeing of employees.

But, creating a culture where employees are motivated to proactively adopt safety knowledge and practices takes more than defining policies and procedures, mandatory compliance training, and employee communications.

Join EHS Today, along with Terry Mathis (Founder & CEO of ProAct Safety) and Carol Leaman (CEO of Axonify) on Thursday, May 9th from 2 - 3 pm as they share strategies for building a proactive culture of safety. They will also discuss:

- The importance of reinforcing and empowering a culture of safety excellence at every level
- Ways to develop the capability within the culture to identify, prioritize, and solve safety problems and challenges with microlearning
- How to maintain and continuously improve safety culture performance through ongoing employee engagement and training
- Real-world examples of how industry leaders like Merck and Walmart are using microlearning to create a culture of safety excellence

Speakers

 **Terry Mathis, Founder and CEO, ProAct Safety®**

Terry Mathis is the founder and CEO of ProAct Safety®, an international safety and performance excellence firm. He is known for his dynamic presentations and writing

in the fields of behavioral and cultural safety, leadership, and operational performance, and is a regular speaker at ASSE (Now ASSP), NSC, and numerous company and industry conferences. He has published over 150 articles in industry magazines and is the coauthor of five books including STEPS to Safety Culture Excellence (WILEY, 2013).

Terry is a veteran of over 1600 safety, culture and performance improvement projects in 39 countries and 21 languages, and has personally assisted organizations such as Georgia-Pacific, Herman Miller, AstraZeneca, Wrigley, ALCOA, Merck, Rockwell Automation, AMCOL International, Ingersoll-Rand and many others to achieve excellence.

 **Carol Leaman, CEO, Axonify**

Carol Leaman (BA, MAcc, FCPA) is an award-winning thought leader with an impressive track record of successfully leading tech companies. Not only is she a disruptor in the corporate learning space, but she's also the brains behind the Axonify Microlearning Platform. Prior to Axonify, Carol was the CEO of PostRank Inc., a social engagement analytics platform she sold to Google. She was also the CEO at several other technology firms, including RSS Solutions and Fakespace Systems.

Carol is a celebrated entrepreneur and trailblazer (Sarah Kirke Award 2010, Waterloo Region Entrepreneur Hall of Fame Intrepid Award 2011 and the Profit500 Award for Canada's Leading Female Entrepreneur 2017) whose articles appear in leading learning, business and technology publications. She also sits on the boards of many organizations and advises a variety of Canadian high-tech firms.

Supercharging Your Safety Program with Hazards & Observations Mobile Technology

written by Lauri Moon | May 30, 2019

This webinar will teach listeners how to turn frontline employees into safety superheroes through mobile applications. The potential of technology will be linked to the reality of EHS managers and frontline staff, including tips on how to evaluate software solutions.

By watching this webinar, you will learn:

- Best practices when implementing a hazard identification program
- How mobile technology can enhance your hazard identification program
- Reality vs. Hype: How technology engages frontline workers
- Top things to consider when evaluating mobile technologies

Speaker:

Amy McNaughton, EHS Professional, InteleX

Amy McNaughton started as a consultant and EHS professional in operational and exploration mining and is now employed at InteleX - a leading EHS software provider. Amy has spent over 10 years on the front line of health and safety in

everything for underground mines, oil and gas facilities, manufacturing plants and retail facilities. Her focus has always been around safety culture and building behavior focused training and open communication environments. Amy has worked on 3 continents, lived in the most remote parts of the world and has been responsible for the safety and culture of the projects she manages.

Safeguarding on Robots and Robot Cells

written by Lauri Moon | May 30, 2019

From the traditional robot to modern technology with collaborative robots, do you know what some of the basic criteria is for safeguarding designs? More and more robots are being introduced and utilized for industrial automation. There are many advantages to Robot Integration, but also comes with challenges on having people effectively work safer on robots and robot cells. Join us to review some of the basic concepts and considerations with robot safeguarding.

Speaker

 **Mike DeRosier, Functional Safety Engineer, Machinery**

Mike DeRosier is a TUV certified Functional Safety Engineer for Machinery. His 20+ years of experience include controls engineering to design, build and integrate full machine control systems. His safety experience lead him to help corporations to develop Corporate Safety Standards, perform machine safeguarding risk assessments, machine safety training and design, as well as implementation of safety systems for all aspects of machinery (electrical, electronic, pneumatic, hydraulic, mechanical).

Lean Behavior Based Safety

written by Lauri Moon | May 30, 2019

Training and behavior-based safety (BBS) programs haven't changed much over the past few decades, but the world—and workforce—has. Manufacturers are now operating in a new reality, with a leaner and more diverse workforce that is

expected to know and do more than ever before. If employees don't know the right thing, or do the wrong thing, it can result in incidents that impact employee morale, turnover and your bottom line.

Organizations know they need an effective BBS strategy, but many struggle to implement programs which achieve desired results. Until now...

Join EHS, along with Terry Mathis (Founder & CEO of ProAct Safety) and Carol Leaman (CEO of Axonify) on Wednesday, December 12th from 2 - 3 pm EST as they discuss strategies for taking your BBS program to the next level, such as:

- Building a proactive culture that promotes safety
- Weaving short bursts of daily training into your frontline's routine to make safe behavior a habit
- Using microlearning to support each phase of BBS

How ISO 45001 Can Help You Lead with Safety

written by Lauri Moon | May 30, 2019

Are you looking to gain executive support to implement ISO 45001 standards? Understanding how ISO 45001 will impact your business, let alone building a business case or convincing executive teams to care, can be hard. However, once

implemented it has the power to supercharge your safety programs and drastically increase the safety of your workforce. Our host, Chris J. Ward, is a former HSE regulator with extensive knowledge on what regulators are looking for, how companies who adhere to ISO 45001 gain a competitive advantage, and the downfalls of failing to comply.

By listening to this webinar, you will:

- Better understand how you can improve your safety programs with ISO 45001
- Learn how to quantify the business impact of those changes, and
- Learn how to articulate the benefits of ISO 45001 to your executive team to drive organizational action.

Speaker

 **Chris J. Ward, Former HSE regulator**

Chris Ward is an ex-UK regulator (Health and Safety Executive) principal inspector. He is a member of the British Standards Institute committee responsible for OHSAS 18001 and the development of ISO 45001, a fatal accident investigator, OHSMS consultant and provider of ISO 45001 assessment scheme.
