

Webinar: Managing Your Safety Program - Beyond Compliance

written by Lauri Moon | April 9, 2018

According to OSHA, a little more than a third of workplaces that were required to file their reports online this year did not file. As a safety professional, your responsibility is to return your employees home safely. But you are also required to submit reports and document activities so you stay in compliance. Managing all of the tasks can be challenging, without tools to support and employee buy-in to engage in your safety program.

In this webinar, safety expert Langdon Dement will discuss the role of employee engagement in managing an effective safety program, and share a new easy-to-use tool that promotes proactive reporting and streamlines the process for submitting files to OSHA and other regulatory bodies.

Speaker

✘ **Langdon Dement, MS, CSP, AEP, EHS Advisor, UL EHS Sustainability**

Langdon Dement, MS, CSP, AEP, is an EHS Advisor with UL EHS Sustainability where he supports UL's mission to promote safe living and working environments around the world by advising companies on improving safety and health in the workplace. Langdon has a decade of experience in general industry, healthcare, and construction projects. In his current position, responsibilities have included safety program implementation for a variety of industries, industrial hygiene analysis, ergonomic program development, and trusted advisory services for international clients and regulatory bodies. He has also become a frequent speaker and facilitator at health and safety conferences nationally and internationally.

Langdon received his Bachelor of Science in Biology from Harding University and a Master of Science in Occupational Safety and Health with an emphasis in Industrial Hygiene (ASAC/ABET accredited). Langdon holds a certification of Certified Safety Professional (CSP) and Associate Ergonomics Professional (AEP). He is also an

OSHA Authorized Outreach Trainer for general industry.

Webinar: Microlearning - The Key to Building a Safety Culture, One Employee at a Time

written by Lauri Moon | April 9, 2018

Companies with the best safety records inherently understand the business benefits of valuing safety, both directly (reduced costs) and indirectly (improved morale and productivity). They get that safety needs to be rooted in the mindsets, attitudes, and behaviors of their workforce and leadership. And they truly believe in the

importance of building a deeply ingrained safety culture.

But how do you get there? It's difficult. It's daunting. But it's now possible with Microlearning!

This proven, science-based approach makes training irresistible and ingrains knowledge deep enough to keep safety top of mind—ultimately, changing on-the-job employee behaviors to deliver significant results, like reduced safety incidents.

Join this EHS webinar to learn:

- What Microlearning is all about
- How Microlearning can play a crucial role in shaping your safety culture
- What to look for in a Microlearning solution
- How leading organizations are putting Microlearning at the core of their safety culture efforts and seeing tremendous success

Speaker

✘ Christine Tutssel, Senior Vice President of Strategic Initiatives

Christine Tutssel is a co-founder of Axonify and Senior Vice President of Strategic Initiatives. In this role, Christine manages Axonify's international business, both direct and through reseller partners, and oversees Axonify's strategic deals in North America. With over 25 years of sales and sales management experience, Christine has helped leading manufacturing, distribution, transportation and logistics organizations engage their employees with a continuous and personalized learning experience that helps drive performance and deliver bottom-line business results.

Prior to Axonify, Christine assisted technology start-ups in building and executing their sales and go-to-market strategies. Previously, she was vice president of sales at Covarity, a software provider specializing in enterprise solutions for the banking industry. Before Covarity, Christine spent seven years at Descartes Systems Group, a leading provider of software and network based solutions for transportation and logistics, where she held a variety of sales and sales management roles.

What to Expect from Trump's OSHA in the New Year

The Trump Administration has taken the reins at OSHA, and the first year of the new OSHA's enforcement and regulatory (or de-regulatory) agenda is in the books. We have already seen significant changes in the way OSHA does business and the tools available to the Agency in its toolkit. Now, as the Trump Administration finishes filling out the OSHA leadership team with its own appointees, we are sure to see more shifting of enforcement priorities, budgets and policies, and an amplified effort to repeal or re-interpret controversial Obama Era OSHA rules and policies. This presentation will forecast for employers the changes and developments at OSHA employers can expect during this period of flux.

Emerging Trends

Several emerging trends and issues will impact the occupational safety and health profession in 2018. This Ted-style talk will discuss the use of drones (UAV), new educational/training tools, the use of robots, new communication and tracking tools, driving safety resources and fatigue tracking devices, all of which will influence the practice of OHS in the coming years.

**JA Rodriguez Jr., CSP, SGE
CEO
Make My Day Strategies LLC**

What's up for the EHS profession in 2018 and beyond? More than meets the eye....

2018 is anticipated to be a big year for change. Future success will be achieved by adopting an enhanced mindset focused on anticipation, preparation, and action in regards to delivering excellence to both internal and external customers. The future of our EHS profession is in the capable hands of those who understand that we must evolve to the point of transformation at a rate slightly higher than the speed of business and of those who embrace a relentless drive to exceed mission requirements.

**Danny Shields, CSP
Director, Industry Relations
Avetta, LLC**

Where Do We Find OHS Within the Sustainability Movement?

Although initially not recognized as an important aspect of sustainability, increasing occupational safety and health (OSH) and supply chain continuity and reliability have raised the profile of OSH in the sustainability conversation. In Danny's presentation, you'll learn how the pillars of sustainability—environmental, economic, and social factors—intersect with OSH.
