

Webinar: CyberSecure My Business - How to Assess Vendor Security

written by Lauri Moon | June 8, 2018

Small and medium-sized businesses (SMB) regularly use outside vendors to help them manage daily business operations.

When SMBs use a vendor, how do they assess the cyber risks that come along with that? What cybersecurity considerations should SMBs use when evaluating whether or not to use a particular vendor?

Join the National Cyber Security Alliance and its partners to learn how to assess vendor security.
