

Suscon, Inc.

written by Lauri Moon | December 2, 2022

“We were able to drastically increase efficiencies on our production lines. The fallout from covid and the current state of the economy are the only reasons we are not experiencing the full benefits from this project. We were able to take our production from 22000 gallons per day to 32000 gallons per day. We have seen that fall back slightly due to employee turnover and staffing issues but are still able to produce 28000-30000 gallons per day regularly. We continue to use the skills to be more preventative instead of reactive. The owner has invested a great deal into the company in equipment to increase efficiencies. I do not think that would have happened without the valuable tools and information gained through the IMC team.”

Diamondback **Automotive** **Accessories, Inc.**

written by Lauri Moon | December 2, 2022

“The results of this project far exceeded my expectations. Every minute and every dollar spent with IMC’s Continuous Improvement team has resulted in tremendous returns. With IMC’s help, we are achieving our mission of being a company that people love to buy from.”

Metal Integrity

written by Lauri Moon | December 2, 2022

“Recent labor challenges drove Metal Integrity into automation or lose business. After some research we settled on a cobot & fully automated lathe system which had some challenges of their own. All in all, we see them as a huge success, well worth the time and investment. We definitely plan to add additional automation as needed!”

Edgemate, Inc.

written by Lauri Moon | December 2, 2022

“The IMC has been involved with my company, Edgemate, Inc. for many years and has provided very valuable services. Dana Gordon has been an excellent representative and in conjunction with Real IT Care, we have improved our IT capabilities and created jobs. Further, through Dana’s involvement, we have investigated other manufacturing software platforms and interfaced with Visual Manufacturing InFor Inc. to continue to keep Edgemate, a leading wood veneer manufacturer in Pennsylvania. Thank you!”

Kwik-Care LLC

written by Lauri Moon | December 2, 2022

“Working with IMC has afforded us great insight into areas that we were lacking knowledge for our business to move forward and do it with efficiency. The value and resources that the IMC has brought to our new company has played an integral part

in our business launch and getting to market this past spring. We are now in retail locations, vacation/campground stores and university bookstores across the country and we would not be here without the IMC.”

“Great team members. Strong expertise. Would recommend them to anyone without hesitation.”

Custom Container Solutions

written by Lauri Moon | December 2, 2022

“IMC’s primary assistance in the last 12 months was HR-related; we are planning on investing 5.5M and hire 30 more hourly workers in the next 12 months and IMC’s support is essential to that investment.”

Hermance Machine Co.

written by Lauri Moon | December 2, 2022

“The local Innovative Manufacturers’ Center personnel were instrumental in assisting us to prepare and qualify for this opportunity. We would have been hard

pressed to complete our appeal to the Governor's Action Team without IMC doing the heavy lifting."

Creative Pultrusions, Inc.

written by Lauri Moon | December 2, 2022

"We appreciate the continued support and the ease to work with the IMC."

Polymics

written by Jeff San George | December 2, 2022

Through the assistance of IMC, we have been able to develop a quality high temperature grout as well as a superior Oil Field Containment System, both of which have opened up new doors and possibilities into a growing industry for Polymics.
