

Williamsport/Lycoming Chamber of Commerce Announces “Project Ventilator”

written by Lauri Moon | March 27, 2020

The Williamsport/Lycoming Chamber of Commerce is helping to identify and coordinate possible resources in our region from those businesses that may be able to assist with the effort. The specific needs are associated with the production of ventilators. If your business is capable of providing any of the following items, please email Jason Fink at jfink@williamsport.org or call 570-320-4213.

Should you know of a company in the region that may have any of the capabilities, please forward it along to them to review. The Chamber will be compiling a list to forward on in coordination of a regional network being developed to address this specific health device need.

- 3D printing capabilities you know of, including contact information
- Suppliers who could source materials for ventilators (specific items are still being determined as to what is required)
- Engineers who could consult on a project like this
- Businesses/owners who could be part of a distribution chain – packaging, shipping, etc.
- Anything else that could be helpful for production of ventilators
