

Process Improvement / LEAN Assessment

IMC's offering a Limited Number of Free Process Improvement / LEAN Assessments to Central PA manufacturers now through February 28th.

"As a result of IMC's assistance, Lycoming Engines was recognized as the global premier award process for operational excellence, has twice gone 1 million hours without a lost time injury, and was recognized as one of Cessna's 'Top Suppliers' by earning their STARS supplier award three consecutive times."
Gary Naculich
Lycoming Engines

Why should you have an Assessment?

- ◆ Are you interested in Reducing Lead Times?
- ◆ Would you like to Increase Productivity?
- ◆ What about Reducing Work in Progress (WIP)?

What is Involved?

1. A brief introductory meeting with your IMC Business Advisor to get acquainted with your business and the challenges you may be facing. We will share an overview of common areas of non-value activities in organizations, which cost you money.
2. We will then schedule a guided tour of the facility with a Process Improvement / Lean expert to follow the flow of orders through the office and the shop. We will identify the areas of non-value, assign a value of high / medium / low to each area and look for evidence of current use of Lean tools.
3. We will review the information gathered with you and offer a summary of opportunities, order of priority based on impact to your business and process improvement tools to consider implementing based on our expertise.
4. You will receive a written report of our analysis and recommendations will be provided. This will provide you with a roadmap for areas to target for improvement that will have the highest impact on your profitability.

To schedule your onsite Process Improvement / LEAN Assessment, contact your IMC Business Advisor or email info@imcpa.com.
